Karachi, Pakistan | saqlainqasim1999@gmail.com | +92 313-2385266 | LinkedIn: saqlain-qasim-7ab0b9231 | GitHub: saqlainqasim

PROFESSIONAL SUMMARY

Detail-oriented WordPress Technical Specialist and Project Coordinator with 4 years of digital agency experience delivering 100+ websites and digital projects for local and international clients. Strong hands-on background in WordPress, WooCommerce, hosting environments, migrations, performance optimisation, security hardening, DNS/email configuration, and cross-browser QA. Experienced as the technical bridge between account managers, design, SEO, development, and clients: gathering requirements, translating briefs into tasks, tracking timelines, managing scope changes, and preparing structured handovers. Holds a BSCS in Computer Science and PMI KICKOFF certification, with Google Project Management Certificate in progress.

CORE SKILLS

WordPress & CMS: WordPress core, PHP, MySQL, Elementor, Divi, WPBakery, WooCommerce, ACF, CPT, Webflow, Wix, Squarespace

Hosting & Technical: cPanel, WHM, Hostinger, GoDaddy, DNS, SSL, MX/SPF/DKIM, Cloudflare, BunnyCDN, phpMyAdmin, Query Monitor

Performance & Security: Core Web Vitals, PageSpeed, Lighthouse, WP Rocket, caching, image optimisation, Wordfence, iThemes, malware removal, backups

Coordination: Requirements gathering, client communication, task ownership, Basecamp, Google Workspace, Agile, Waterfall, SOPs, MOMs, risk and blocker flagging, QA coordination

PROFESSIONAL EXPERIENCE

Web Developer, WordPress Technical Specialist & Project Coordinator | Hashone Digital, Karachi

March 2022 - January 2026 | Full-service digital agency serving local and international clients, including Upwork and freelance accounts

- Coordinated delivery of 100+ web and digital projects across development, design, SEO, content, and account management teams throughout the full project lifecycle.
- Translated client briefs into structured requirements, task lists, timelines, QA checkpoints, and handover steps so teams had clear execution direction from day one.
- Managed WordPress hosting environments across cPanel, WHM, Hostinger, and GoDaddy, including server configuration, SSL setup, DNS management, domain pointing, and email routing.
- Optimised Core Web Vitals and PageSpeed scores using WP Rocket, CDN configuration, image compression, code minification, database cleanup, and plugin performance reviews.
- Executed zero-downtime WordPress migrations and cloning between hosting providers and staging/production environments, managing DNS cutovers and launch readiness.
- Implemented WordPress security hardening, vulnerability monitoring, malware cleanup, automated backups, and disaster recovery workflows using Wordfence, iThemes, and migration tools.
- Tracked concurrent project pipelines in Basecamp, assigning owners, following up on milestones, flagging blockers early, and keeping status updates accurate.
- Coordinated scope changes and post-delivery amendments by assessing feasibility, aligning with the right team, and communicating clear resolution timelines.
- Produced SOPs, meeting notes, and Loom tutorials for 40+ client handovers, standardising documentation and helping clients manage their websites confidently.
- Conducted cross-browser and cross-device QA before delivery to confirm responsive layouts, functional forms, stable CMS behaviour, and launch quality.

SELECTED PROJECT HIGHLIGHTS

- **WooCommerce 500+ SKU Platform:** Coordinated and supported a large product catalogue build across client, design, development, and payment gateway teams, keeping scope, blockers, and delivery milestones visible.
- **Performance Overhauls:** Improved speed and Core Web Vitals across multiple WordPress sites through caching, CDN setup, image optimisation, database cleanup, and technical QA.

- **Site Migrations:** Completed 20+ WordPress migrations across hosting providers with zero data loss, staging setup, DNS cutover management, and post-launch checks.
- **Healthcare Booking Delivery:** Managed a 6-week multi-stakeholder website delivery from requirements through QA and final handover, coordinating dev, design, and SEO workstreams.
- **Security & Malware Recovery:** Cleaned and hardened compromised WordPress sites, removed malware, configured Wordfence, and set up reliable backup workflows.
